JON·ARBE

GAME DESIGNER · SLOTS & GAME FEEL

Tokyo, Japan · remote ■ j.arbegaldos@gmail.com ■ linkedin.com/in/jon-arbe ■ Portfolio & playable demo

PROFILE

Game designer focused on **slots and game feel**, based in Tokyo and looking for remote roles. I designed and directed **Ossuary Reels** as a solo designer: a playable dark-fantasy slot with a ribcage-shaped board, 173 paylines and three chained bonus features. I design around what the player feels: anticipation, near-misses and wins that land with weight.

FEATURED PROJECT

Ossuary Reels — Game Designer & Director

Jun 2026 – present

Personal project · Solo designer + AI-assisted development · Web (desktop & mobile) · **Playable beta**

- **Designed a non-standard board:** independent reels arranged as a ribcage, with a 173-line payline network built for that shape.
- **Designed three interlocking bonus features:** the Raven chain (free spins that continue while ravens fall, stone hit odds stepping down from 62% to 25%), the Chest gamble (collect or risk it on an 11-slot wheel) and the Execution Bonus (respin lock-in, three lives, multiplier ladder from ×2 to ×100).
- **Set probability targets per feature** (e.g. a big payout in about 1 of 20 Raven Bonus buys) and reshaped hit distributions through playtesting; final RTP tuning (target 98%) in progress.
- **Directed art, animation and audio:** anticipation effects, a custom HUD, and a big-win counter timed to its music so the number lands on the cymbal hits.
- **Built and iterated the game in HTML/JavaScript** by directing AI coding agents (Claude Code, Codex): 244 logged changes since June 2026, including rebuilding the whole reel structure when it worked but didn't feel right.

EXPERIENCE BEFORE GAMES

Ten years of hands-on, precision work: production lines, prototypes, maintenance and pastry.

Pastry Chef · EDITION, Tokyo — Nov 2025 – present

Industrial Maintenance Specialist · Serveo, Spain — 2024 – 2025

Press Operator & Metalworker · PFERD, Fiasa — 2023 – 2024

Prototype Welding Technician · Mercedes-Benz — 2022 – 2023

Logistics & Production Operator · DHL, CEVA — 2015 – 2022

AVAILABILITY

Looking for remote roles. Based in Tokyo (JST), available full-time.

DESIGN SKILLS

- Slot & bonus design
- Board & payline design
- Probability & hit-rate targets
- Game feel & pacing
- Playtesting & iteration
- Art & audio direction
